

CloudCheckr CMx High Security

Cloud management hardened to NIST 800-53 standards to accelerate cloud adoption among financial services, public sector, healthcare, and other regulated industries

In support of our partners in financial services, government, higher education, and healthcare, CloudCheckr CMx High Security™ environment offers a number of advantages, including:

- Fortification meeting the most stringent regulatory compliance frameworks
- High availability, reliability, and disaster recovery standards
- Enhanced software deployment at full parity with large-scale commercial solutions
- AI-based threat detection

Compliance as Code

Environment created via automation for rigorous, replicable results

- Faster team approvals
- Easier compliance audits
- Eliminate manual errors and labor

Maximum Security

Additional AI-based security monitoring to enhance threat-detection capabilities

- Intrusion detection
- File integrity
- Continuous vulnerability scans

Availability and Reliability

Improve access to cloud management functions

- Higher uptime of mission-critical systems
- 99.5% System Uptime SLA (Service Level Agreement)
- High-Availability (Hot-Hot) redundancy

Disaster Recovery

Runs in two Availability Zones for protection with backups in a separate and distinct region

- 15-minute Recover Time Objective
- 5-minute Recovery Point Objective

CMx High Security Features

Feature Matrix	CMx	CMx High Security
Certifications	SOC 2	SOC 2 + NIST 800-53
Automatic checks against 600+ best practices	✓	✓
Error and issue analysis	✓	✓
Network and infrastructure monitoring	✓	✓
Least privilege model for all staff	✓	✓
Logging and retention of all internal communication	✓	✓
Compliance tracking against 35 frameworks	✓	✓
Bi-weekly software updates	✓	✓
Background checks for CloudCheckr staff	✓	✓
In-depth threat detection monitoring	✓	Yes, plus Artificial Intelligence monitoring
Encryption – In transit	✓	✓
Encryption – At rest	Sensitive database fields	Everything

Feature Matrix	CMx	CMx High Security
Encryption — FIPS Validated	X	✓
Hardened to 300+ NIST 800-53 controls	X	✓
Security incident response assistance	X	✓
MFA access required for CloudCheckr staff	X	✓
Compliance as Code deployment model	X	✓
Vulnerability scan frequency	Quarterly	Daily
System Uptime SLA	99%	99.9%
System Availability	Standard Availability (hot-backup)	High Availability (hot-hot)
Pricing	Standard Rates	Standard Rates + FR Rate Card

Take advantage of powerful commercial-grade cloud management while also benefiting from total security and continuous availability. Schedule a custom demo at cloudcheckr.com/demo

About CloudCheckr

CloudCheckr gives organizations control of their cloud. The CloudCheckr CMx platform proactively analyzes cloud infrastructure to provide visibility and intelligence to better manage costs, make infrastructure more secure and in compliance, and optimize resources in use. Thousands of enterprises, public sector organizations and managed service providers rely on CloudCheckr to help manage and govern \$4 billion in annualized spend for their complex cloud environments. For more information, visit **CloudCheckr.com**, connect with CloudCheckr on **LinkedIn**, or explore the **CloudCheckr Resource Center**.
